*In honor of Valentine's Day, this month's hot topic is:*

## “How to be HEART SMART in 2010”

**In this issue, we'll highlight a few natural alternatives to consider when you are looking for Heart Smart solutions.**

### **Did you know that BODY BIOTICS™ Probiotic Supplements is a natural CHELATING AGENT?**

*After 33 years in the marketplace focusing on the Probiotic/Prebiotics benefits of BODY BIOTICS™, this additional critical health benefit has finally come to light.*

#### **What is Chelation Therapy?**

The chelation process serves the purpose of removing heavy metals from the body by using amino acids to create bonds between undesired minerals so that the body can get rid of them. The most common method of chelation therapy involves a drug called EDTA (ethylene diamine tetraacetic acid), which is approved by the FDA when used in this way. EDTA is prepared with a solution of vitamins and minerals and administered intravenously. **BODY BIOTICS acts as a natural agent to bond with these heavy metals and gently remove them from the body.**

Today, the danger of heavy metal toxicity is becoming more and more prevalent. These toxic heavy metals pose a great threat to all of us and may lead to a decline in the mental, cognitive, and physical health of the individual. Metals that are often associated with toxicity in the body are mercury, arsenic, and cadmium. Many of these metals, such as zinc, copper, chromium, iron, and manganese, are required by the body for normal function. However, even these required metals up to a certain point can become toxic and begin to interfere with normal organ system function. **Daily ingestion of BODY BIOTICS Probiotics supplement, acting as a natural chelating agent, is designed to restore the normal function of these vital organs.**

Here is a brief list of the many benefits reported on from natural chelation.

#### **Chelation Therapy helps to:**

- Rejuvenate your cardiovascular system
- Reduce toxic lead, calcium, and metal deposits
- Reduce leg cramps
- Improve liver & kidney function
- Increase circulation to the brain

## Q. Lifestyle Question of the Month:

What is a stroke? Would you know if someone was having a stroke in front of you?

Strokes are the nation's 3rd leading cause of death. There are several types of strokes, but all can have a devastating impact on the survivor and loved ones.

Among many other symptoms, a person suffering from a stroke may:

- Be unable to process language, read, think, see or swallow
- Have sudden numbness of the face, arm, leg or one side of the body
- Have a severe headache with no cause

Here are three simple questions to find out:

1. Ask the person to smile.
2. Ask the person to raise both their arms.

### What are some of the symptoms of high toxic levels of heavy metals in the body?

The following list will give you a brief overview of some symptoms associated with high levels of heavy metals in the body. Keep in mind that experiencing one or two of these symptoms does not automatically mean that you have been exposed to toxic levels of these elements. This is simply a list that might help you to recognize a potential health issue and help you to determine if natural chelation is something that you may benefit from.

For more information and to determine if you are experiencing toxic levels of heavy metals, you should contact a health professional trained in this area. Some of the negative effects of heavy metal toxicity that you should watch out for are: tremors,, depression, mood swings, irritability, poor concentration, aggressive behavior, sleep disabilities, fatigue, speech disorders, neuropathy, and hair loss.

#### Other Symptoms:

- Headaches
- High Blood Pressure
- Cardiovascular Disease
- Metallic Taste in Mouth
- Diarrhea / Constipation
- Chronic Fatigue
- Memory Loss
- Altered Sense of Smell
- Increased Allergic Reactions
- Autoimmune Diseases

## Real Answers To Real Questions

Book on CD by Philip Cloudpiler Landis, NAP, N.D.

We believe that learning self-care is one of the most important pieces of knowledge one can develop. And, one of the most encouraging new books that we have come across and recommend is a digital book on CD from Chief Philip Cloudpiler Landis of the Nemenhah

Band and Native American Traditions Organization. You will find more details about Nemenhah and why it is important on page 3 of this newsletter.

Chief Cloudpiler has some very wise health. Chief Cloudpiler has some very informative information in his book that

advice in his book, that complements our lead story on being Heart Smart. Some topics of interest are:

#### Chapter 4:

#### Center Self – Circulatory System\*

##### Causes of Heart Disease\*

“The disease of the heart can be placed in just a few categories, most of which are linked to diet and lifestyle. These include damage to the heart muscle because of lack of oxygen or nutrition...”

##### Dietary Guidelines\*

Eat a diet high in fiber, lean meats but sparingly, fresh fruits and vegetables.

Whole grains are recommended.

Do not use table salt. Use a good, balanced sea salt instead.

##### Nutritional Supplements for the Circulatory System\*

#### Primary Nutrients:

- Calcium
- Magnesium
- Potassium
- Vitamin E

#### Life Science Products Solution:

Because BODY BIOTICS™ is a natural whole-food supplement that addresses the whole body systemically, it aids the body's natural healing abilities in many ways. Not only is Body Biotics™ a natural chelating agent, it also aids the body in producing one

of the most powerful free radical fighters, Super Oxide Dismutase.

Additionally, our LIFE'S GREEN ESSENTIALS™ green superfood, which includes all of the primary nutrients listed in Chief Cloudpiller's books and many others, is a solution to help fortify the body's nutritional supplements needs.

Here is a list of some of the above mentioned nutrients that LIFE'S GREEN ESSENTIALS™ green superfood contains:

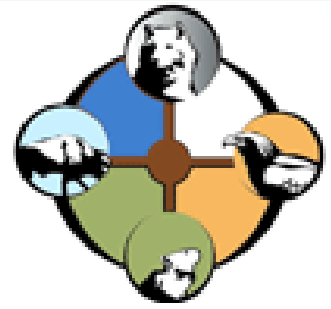

**Calcium:** This mineral is among the most important to maintain or normalize blood pressure. It is also the most popular mineral for regulating the body pH. Calcium must not be used without Magnesium and Potassium. To mega-dose with Calcium only is unwise and even unsafe.

**Magnesium:** The proper balance of minerals like magnesium is vital for regulating blood pressure and for nourishing heart muscle.

**Potassium:** The ratio of sodium to potassium is considered a profound determinant of blood pressure. Supplementation is of value. Additionally, Potassium is an electrolyte that helps regulate heart contraction.

**Vitamin E:** This vitamin is a free radical scavenger and helps to protect against heart disease and stroke by reducing LDL cholesterol.

Customer Testimonial

Having worked as a health coach for over 25 years, I have a good idea of what it takes to regain and maintain health. I know that we have about 5-7 lbs of bacterium in our bodies – hopefully more good guys than bad. Nutrition and Probiotics have been part of my family and clients regimen for many years. My grandchildren have had the finest foods and nutritional supplements all of their lives, and yet, years ago when they started preschool, to my wonderment, they brought home about every bacterium available! They obviously had more BAD guys than good! I immediately started them on the Kds Chewable Body Biotics™ and they have not had a problem since. Regular Probiotics supplements removed from their food source can help, however they cannot come close to the power of Body Biotics™ live soil based organisms encapsulated in their food source. My clients all get the same results – EXCELLENT! This is the best gut insurance available.!
